COLLECTION

SPECIFICATION

Tiles can be made from various materials like ceramic, porcelain, glass, natural stone (Such as marble, granite, travertine), and even metal or cement. The durability of a tile depends on the material used.

Porcelain tiles, for example, are known for their strength and resistance to moisture and wear.

AREA

Always consider the type of tile, its properties, and suitability for the intended area before installation to ensure longevity and functionality in that particular space.

Tiles are incredibly versatile and can be used in various areas both indoors and outdoors.
